

B & H Wood Rails Hook Plate Template

1. **Before Printing:** Make sure the page size is set to 100%. If you don't see the toolbar, perform the following: Click on **View**, then **Toolbars**, then **Show Toolbars**. Set the page size to 100% (as pictured below in yellow.)

2. For best results, print the Wood Rail Hook Template on thick paper or card stock.
3. Cut out the hook template (at left) using an X-acto® knife or scissors.
4. Remove your current bed rails from your bed.
5. Insert completed template into your bed just as you would your bed rails. Does it fit? If so, our wooden rails should work for you.
