Step 1. Lay out all parts as shown. You will need a screwdriver and a pair of pliers or a 7/16" wrench for assembly.

Step 2. Attach corner bracket to corner of Smart Base using the truss head machine screw bolt and hex nut. Tighten as shown. Repeat on opposite corner.

Step 3. Insert round head bolt through holes in leg of bed. There are two holes per leg. Slide nylon spacer over threaded bolt. Repeat on opposite corner.

Step 4. Slide the bed up to the Smart base and guide the bolts through the slots of the bracket. Thread the hex nut onto the bolt. Repeat on opposite corner.

Step 5. Tighten the nuts to hold the bed securely against the bracket. Repeat on opposite corner.

Step 6. Your finished installation should look as shown above.
